## Curtain Systems

Curtains are a hassle free way of providing natural light and proper ventilation to your structure. There are several varieties to choose from. Talk with your local dealer or sales representative to see what options would work best for your facility!

The benefits of a curtain system are:

- Suitable for all climates & weather systems.
- Low maintenance.
- A variety of curtain material options & weights are available.
- Manual or electric operation.
- Temperature controllers available for fully automated systems.
- Corrosion resistant hardware.
- Easy installation.
- A variety of wind support systems are available.
- Works with any type of structure, steel or wood!

Types of Curtains:

- Roll-Over - instead of the material folding, it is rolled into a pipe.
- No-Main - operated without the use of a main cable.
- Vista - offers the largest unobstructed opening on the market.
- Roll-Up - the ultimate in climate control.
- Original Top Down - the simple & cost efficient curtain solution.
- Split - suited for large sidewall openings.
- Parlour - an affordable divider between sections of building.
- Weather Stop - used to close in large doors & openings.
- Winter Garden - protects the health & welfare of your chickens.

**Systems Designed to Ensure You  
Have Optimal Ventilation!**
