Insulated Curtains

The best thermal curtain on the market!

Our insulated curtain consists of:

- An exterior layer of UV stabilized, non-breathable polyethylene weave material to the weather side.
- 8 inner layers of thermal non-woven polyester fabric.
- An outer layer of UV stabilized, non-breathable polyethylene weave material to the barn side.
- All 10 layers are resistant to the harsh chemical environment found in farm buildings.
- These layers will not absorb moisture and are mildew and rot resistant.
- Several standard heights and custom lengths are available.
- Extra horizontal hems can be requested for additional weight and for easier folding.
- Sun-North carries different insulated material options from dark-out to light penetrating.

**Systems Designed to Ensure You
Have Optimal Ventilation!**
